Dear Sirs,

I was referred to your organization by "International Rehabilitation Council for Torture Victims" (<http://irct.org/>) Brussels office - I visited them in person in November this year, asking for help with contact information for doctors / clinics who can prepare an interdisciplinary medico-legal opinion in cruel and inhuman treatment / possible medical experimentation case.

Kindly please advise whether your organization - and if not, if you can provide me with contact information for those that do - can prepare an interdisciplinary (specializations such as urology, neurology, dermatology, and andrology if possible) medico-legal opinion on my behalf, including conducting any necessary medical tests, and how much approximately such service would cost.

I can provide more information / background of this matter if needed, but would like to focus on what's most important at this stage, i.e. comprehensive medico-legal opinion, so criminal / human rights violations investigation can be conducted properly.

Thank you very much for your help in this matter.

Kind regards,
Michal Siemaszko
